Summary

Driven and hands-on Computer Science student with real-world experience as an IT Intern in an industrial control environment. Ability to image and deploy systems, conduct firewall gap analysis, identify vulnerabilities, and document technical processes. Familiar with industrial network architectures such as the Purdue Model and experienced in supporting both IT and OT infrastructure. Strong communicator with a passion for learning and adaptable to complex environments.

Skills

- Malware analysis
- Laptop imaging and deployment
- Firewall gap analysis
- Vulnerability identification
- Technical documentation
- Problem solving
- Communication and presentation
- Adaptability
- Self-motivated learner

Education

Bachelor's of Science

Louisiana State University

Baton Rouge

Computer Science(concentration in Cybersecurity), Expected in 12/2025

- Senior
- GPA: 3.5 GPA
- Dean's List

Experience

Methanex

IT Intern | Geismar, Louisiana 05/2025 to 08/2025

- Imaged, configured, and deployed Windows-based laptops for end users, following company policies for software and security standards.
- Gained practical experience in OT/IT segmentation and cybersecurity principles through the analysis of plant network infrastructure.
- Documented technical processes and user instructions for reference.
- Assisted in setting up and configuring a CCTV server to support physical security monitoring, including storage allocation and system access permissions.
- Conducted a firewall gap analysis between the Distributed control system perimeter firewalls and the DMZ perimeter firewalls, identifying misconfigured rules, open RDP ports, and overly broad IP ranges, and made remediation recommendations.
- Shadowed IT and OT professionals to better understand system interdependencies and network security in critical infrastructure environments.

Hobbies and Interests

Camping, Overlanding, Auto Mechanic, Fishing

Extracurricular Activities

I am a Sunday school teacher at Healing Place Church. Every Sunday I teach a class of 5th and 6th graders; this has greatly helped with my presentation abilities and my communication skills. This commitment has improved my ability to lead and effectively teach a various array of topics.
